

AUREO PRIVACY POLICY, KVKK DISCLOSURE NOTICE AND GDPR NOTICE

Effective date: May 10, 2026

Last updated: May 10, 2026

Document version: 2026-05-10

Mandatory controller details before release: The real individual or company name, serviceable postal address, country, trade registry/MERSIS/VERBIS details if applicable, EU or United Kingdom representative if applicable, and contact channels in this section must be completed before this document is published to end users.

Data controller/publisher: [Publisher individual name or company legal name]

Address: [Serviceable postal address]

Country: [Country]

Email: privacy@getaureo.app

EU/EEA or United Kingdom representative: [Representative name and contact details if applicable; if not applicable, write "not appointed" after scope assessment]

VERBIS status: [Registration details or exemption assessment if applicable]

This Privacy Policy, KVKK Disclosure Notice and GDPR Notice ("Policy") explains how personal data is processed when the Aureo mobile application is used; for which purposes, by which methods and on which legal bases it is processed; to whom it may be transferred; how long it may be retained; and how advertising, tracking, device identifiers and international transfers are handled.

1. Scope

This Policy applies to the Aureo mobile application, onboarding screens, settings, watchlists, favorites, home-screen widgets, advertising preferences, market data requests, crash reporting, performance monitoring, security checks and backend services connected to the application.

This Policy does not apply to third-party websites, applications, exchanges, data providers, advertising networks or social media platforms that you may access through ads or links inside the application. Such third parties have their own privacy policies and terms of use.

For users in Turkey, this document is a disclosure notice under the Turkish Personal Data Protection Law No. 6698 ("KVKK"). For users in the EU/EEA, it is an information notice under the General Data Protection Regulation ("GDPR"). For storing or accessing information on terminal equipment, it also provides a general explanation of relevant ePrivacy/local implementation rules.

2. Data not collected

Aureo does not ask you for your full name, Turkish identification number, passport number, open residential address, bank account, credit card, investment account, crypto wallet private key, portfolio size, income information, indebtedness information, risk profile, order information or brokerage login credentials.

Aureo does not access your investment account, bank account, payment card, crypto wallet or brokerage account. Because the application does not perform financial transactions, it does not process orders, balances, account movements, custody information or real portfolio information.

3. Categories of data that may be processed

Aureo processes limited personal data that is connected with and necessary for the service. The categories of data that may be processed include:

- Device and technical identity data: Firebase anonymous user ID, app-specific device ID, Android device ID, iOS identifierForVendor, app identifier stored in iOS Keychain, app version, operating system, device model, device language, region, time zone, screen and platform information.
- Connection and security data: IP address, App Check signals, network status, request times, backend endpoint accesses, WebSocket connection status, rate-limit logs and technical patterns indicating possible misuse.
- Preference and usage data: language, quote currency, advertising preference, onboarding state, accepted legal document versions, acceptance time, theme or display preferences, watchlists, favorites, list memberships, list ordering, home-screen widget configurations and selected assets.
- Market data usage context: viewed symbols, category selections, search terms, price or snapshot requests, selected market tabs, update times and technical response states.
- Crash and performance data: application crash reports, error logs, performance measurements, loading times, device/operating system context and diagnostic technical information.
- Advertising and consent data: Google AdMob advertising identifiers, ad impression and interaction signals, personalized or non-personalized ad preference, iOS App Tracking Transparency status, Google UMP/CMP consent signals and ad privacy choices.
- Contact data: If you email us, your email address, request content, attachments and support correspondence may be processed.

4. Device identifiers and persistence after reinstall

Aureo may use device-based technical identifiers for abuse prevention, rate limiting, anonymous session continuity and security. Android ID may be used on Android; identifierForVendor or an app identifier stored in Keychain may be used on iOS.

iOS Keychain and some Android identifiers may persist for a period even if the application is deleted and reinstalled. This persistence is used for security, rate limiting and anonymous session continuity, not for advertising tracking. Users may send deletion or objection requests to privacy@getaureo.app.

5. Purposes of processing

Your personal data may be processed for the following purposes:

- Operating the application, creating anonymous sessions and maintaining device-based technical continuity.
- Saving watchlists, favorites, language, quote currency, onboarding, legal acceptance and advertising preferences.
- Providing market data, price updates, WebSocket connections, snapshot requests and home-screen widget content.
- Protecting application security and preventing misuse, bot behavior, excessive requests and unauthorized access attempts.
- Detecting and resolving errors, crashes, performance problems and connection issues, and improving service quality.
- Displaying ads, managing ad frequency, and applying personalized or non-personalized advertising preferences.
- Responding to user requests, providing support, managing KVKK/GDPR requests and fulfilling legal obligations.

- Keeping records necessary for the establishment, exercise or protection of legal rights.

6. KVKK legal grounds

Under KVKK, your personal data may be processed based on the following legal grounds:

- Necessity for the establishment or performance of a contract: providing core application features, managing anonymous sessions and operating watchlists and preferences.
- Legitimate interests of the data controller: security, debugging, performance measurement, abuse prevention, maintaining service quality, limited diagnostic activities and keeping legal records.
- Compliance with legal obligations: responding to competent authority requests and fulfilling statutory retention or notification duties.
- Establishment, exercise or protection of a right: dispute, application, audit, claim or defense processes.
- Explicit consent: personalized ads, tracking permission, specific international transfers that legally require explicit consent and other processing activities that require consent by law.

Where processing is based on explicit consent, you may withdraw your consent at any time. Withdrawal does not affect the lawfulness of processing carried out before withdrawal. Withdrawal may limit optional features or advertising personalization.

7. GDPR legal bases

For users in the EU/EEA or United Kingdom, personal data may be processed on the following bases:

- Performance of a contract: core application functions, watchlists, favorites, widgets and user preferences.
- Legitimate interests: security, abuse prevention, debugging, performance improvement, service integrity and management of legal claims.
- Legal obligation: competent authority requests, consumer, tax or platform-related mandatory records.
- Consent: advertising personalization, non-essential storing or accessing of information on terminal equipment, Google UMP/CMP purposes, tracking under Apple's ATT framework and similar optional processing.

Consent under GDPR must be freely given, specific, informed and unambiguous. Refusing consent should not unnecessarily block access to the core service, but it may affect optional features such as advertising personalization.

8. Collection methods

Your data is collected electronically through automatic or partially automatic means when you use the application. These methods may include mobile SDKs, Firebase, Firebase Authentication, Crashlytics, Performance Monitoring, App Check, Google AdMob, Google UMP, device operating system APIs, local storage, Keychain/SharedPreferences-like platform mechanisms, backend API requests and WebSocket connections.

If you contact us for support by email, your data may also be processed through non-automatic means that are part of an electronic filing system.

9. Recipient groups

Your personal data may be shared, limited to the relevant purpose, with the following recipient groups:

- Cloud infrastructure and backend service providers.
- Google Firebase, Firebase Authentication, Firebase Crashlytics, Firebase Performance Monitoring, Firebase App Check and similar technical services.

- Google AdMob, Google UMP/CMP and advertising technology providers.
- Apple and Google app store and platform services.
- Market data, connection, security, error monitoring and diagnostic service providers.
- Legally authorized public institutions, courts, enforcement offices and regulatory authorities.
- Persons providing technical support, consultancy or legal services on behalf of the Publisher, only to the extent necessary.

Data transfers are carried out in line with KVKK/GDPR general principles, data minimization and applicable processing conditions.

10. International data transfers

Aureo may use global services such as Firebase, Google Cloud, Google AdMob, Apple services, crash reporting, performance monitoring, security, infrastructure and market data providers. These services may operate servers outside Turkey or may access data from outside Turkey.

For KVKK, international transfers should primarily be assessed through adequacy decisions, appropriate safeguards, standard contracts, binding corporate rules, undertakings or other transfer mechanisms provided by law. A general, unlimited and service-wide blanket consent should not be used as the sole mechanism for regular international transfers.

The international transfer notice in the onboarding screen allows the User to see which provider groups may receive data and for which purposes. This checkbox must not be interpreted as unlimited explicit consent for all international transfers. If a separate, optional or occasional transfer requiring explicit consent occurs, the User will be separately informed about the recipients, purposes, data categories, possible risks and withdrawal method.

For GDPR, transfers outside the EU/EEA are handled through mechanisms such as adequacy decisions, standard contractual clauses, binding corporate rules or limited derogations under the GDPR.

11. Ads, UMP, ATT and local storage

Aureo may display Google AdMob ads to support a free use model. Personalized ads may use prior activity, app usage, advertising identifiers, interests or similar signals. Non-personalized ads do not use past behavior for targeting, but may still use limited signals for contextual display, approximate location, app content, frequency capping and measurement.

For users in the European Economic Area, the United Kingdom and Switzerland, Google's certified UMP/CMP screens may be displayed. These screens separately explain advertising technology providers, purposes and preference choices. The simple personalized ads choice inside the application does not replace Google UMP/CMP or the relevant ePrivacy/GDPR consent.

On iOS, Apple App Tracking Transparency permission may be requested through the system prompt. ATT permission does not replace all consent requirements under GDPR/KVKK; it only refers to tracking permission under Apple's platform rules.

In the EU/EEA, storing information on a device or accessing information already stored on a device may trigger ePrivacy/local implementation rules. Consent may be required for advertising, measurement or similar technologies that are not strictly necessary for the service.

12. Retention periods

Your personal data is retained for as long as required by the processing purpose. Retention periods may vary by data type, technical infrastructure, legal obligations and service-provider policies.

- Watchlists, favorites and local preferences: may be retained until you delete them, clear application data or the anonymous session/device record ceases to be valid.

- Legal acceptance records: accepted document version, acceptance time and language may be retained for relevant limitation periods for legal evidence and dispute management.
- Technical identifiers: may be retained for service continuity, security and abuse-prevention purposes while the service continues or for as long as technically necessary.
- Crash and performance records: may be retained for the service provider's technical retention periods for debugging and quality improvement, then deleted or anonymized.
- Advertising and UMP/CMP signals: may be processed under Google, Apple or relevant provider policies and user preferences.
- Support correspondence: may be retained for the period necessary to resolve the request, manage possible disputes and comply with legal obligations.

When the processing purpose ends and there is no statutory retention requirement, data is deleted, destroyed or anonymized.

13. Data security

The Publisher takes reasonable technical and administrative measures to prevent unlawful processing of and access to personal data and to safeguard data. These measures may include encrypted connections, secure cloud services, App Check, access controls, error monitoring, rate limiting, security logs and platform security tools.

However, no transmission over the internet, mobile devices, third-party SDKs or wireless networks can be considered one hundred percent secure. The User is responsible for keeping their device updated, using a secure lock, avoiding modified applications from outside app stores and protecting device security.

14. User preferences

You may manage language, quote currency, ad personalization, ATT permission, notifications and some local preferences in the application or device settings. Ad privacy choices may also be managed through Google UMP/CMP screens or device settings.

Removing the application may delete some local data; however, iOS Keychain, Android system identifiers, app store records or third-party provider records may remain longer due to platform policies. For withdrawal of consent, data deletion or access requests, you may email privacy@getaureo.app.

15. Children's privacy

Aureo is not directed to persons under 18 years of age. The Publisher does not knowingly intend to collect personal data from children. If you believe that personal data of a person under 18 has been processed, you may contact us so that relevant records can be reviewed and deleted where possible.

Under EU/EEA rules, profile-based advertising to children should not be carried out. The application should not be used as a child-directed product, investment education product for children or child finance application.

16. Financial data and profiling

Prices, change rates, charts, market session information and notifications shown in Aureo are for informational purposes only. Aureo does not assess your personal investment objective, financial condition, risk-return preference or investment knowledge. Therefore, the application does not provide investment advisory, portfolio management or personalized recommendation services.

Watchlists and favorites are used only to personalize the app experience and redisplay assets you choose. These data do not conclusively represent your real portfolio, investment intention or financial situation. Aureo does not conduct suitability or appropriateness tests like an authorized investment

institution.

17. Competent authority requests

The Publisher may be required to respond to lawful requests from competent courts, prosecutors, regulatory authorities, administrative bodies or law enforcement under applicable law. In such cases, only the data legally required and relevant to the request is shared.

Some records may be retained and shared with relevant advisers where necessary for the establishment, exercise or protection of legal rights.

18. Rights under KVKK Article 11

Under KVKK Article 11, you may apply to the data controller and exercise the following rights:

- Learn whether your personal data is processed.
- Request information if your personal data has been processed.
- Learn the purpose of processing and whether data is used in accordance with that purpose.
- Learn the third parties to whom data is transferred domestically or abroad.
- Request correction if data is incomplete or inaccurate.
- Request deletion or destruction under the conditions set out in KVKK.
- Request notification of correction, deletion or destruction to third parties to whom data was transferred.
- Object to a result against you arising from analysis exclusively through automated systems.
- Request compensation if you suffer damage due to unlawful processing.

You may exercise these rights by contacting privacy@getaureo.app. Requests will be evaluated as soon as possible and within the periods required by applicable law, depending on their nature.

19. GDPR rights

Users covered by GDPR have the following rights to the extent applicable:

- Right of access.
- Right to rectification.
- Right to erasure.
- Right to restriction of processing.
- Right to data portability.
- Right to object to processing based on legitimate interests.
- Right to withdraw consent for consent-based processing.
- Rights relating to decisions based solely on automated processing.
- Right to lodge a complaint with a competent data protection authority.

If the Publisher offers goods or services to users in the EU/EEA or United Kingdom or monitors their behavior, the GDPR scope assessment, representative appointment requirement and competent authority details must be completed separately.

20. App Store and Google Play disclosures

Apple App Store Privacy Nutrition Label and Google Play Data Safety form entries must be consistent with this Policy. Data collection and sharing disclosures caused by Firebase, AdMob, Crashlytics, Performance Monitoring, App Check, advertising ID, device ID, crash data and third-party SDKs must also be accurately marked in the store consoles.

If the data inventory in this Policy changes, app store privacy disclosures must be updated in the same release cycle.

21. Changes to this Policy

This Policy may be updated as application features, infrastructure providers, advertising model, law or technical requirements change. For material changes, notice may be provided in the application, onboarding flow, update notes or another appropriate channel.

The current Policy becomes effective when published in the application. A renewed acceptance or renewed notice flow may be applied for material changes.

22. Contact

For privacy, personal data, data deletion, withdrawal of consent, advertising preferences, KVKK/GDPR rights or support requests, you may contact us at privacy@getaureo.app. Depending on the nature of your request, we may ask for additional information to verify your identity or to confirm that the relevant device or anonymous session belongs to you.
